Technical Pre-sales

As sent in the mail earlier, all staffs should be informed of the new corporate internet access portal. Details of how to access the internet on your laptop is included in the mail.

TAXI SALAM

In the coming weeks, we will be venturing into the e-transport world with our new service called Taxi Salam. This is an online mobile app aimed at providing taxi services to all types of people in best rate based on distance travelled per trip.

Heading this project is Mr. Samson Omopariola and his team. Currently, the team is onboarding drivers onto the platform as this is an important section of the project. The successful onboarding of these drivers will take the project to its next phase which is registering new riders whom are the final piece of the puzzle.

While we await the Taxi Salam team on giving us a date for the launch, we want to appeal to ALL STAFF to kindly assist the team with the contacts of any Uber and Taxify drivers available to us. This will aid the team in achieving its goal of successfully onboarding 1000 drivers the end of the month.

Finance
